

4B Group Announces the Opening of 4B Indonesia

Jakarta / Indonesia – The 4B Group, global market leader in bucket elevator and conveyor components, is pleased to confirm the opening of its new subsidiary, 4B Indonesia, on 1st May 2025. Located in Jakarta, the new office and warehouse facility will add to 4B's success in the Indonesian market and provide enhanced service levels to customers around the region.

Indonesia, which was previously serviced by 4B Australia, offers significant potential in the areas of bulk material handling, rice milling, and feedstock. Due to the growing population and demand for animal protein, Indonesia's feed market is expanding quickly, with the population increase and animal protein demand driving the need for effective bulk storage and handling. With a dedicated local presence, 4B Indonesia will enhance customer support, reduce lead times, and ensure faster order turnaround with local stock availability.

Under the leadership of Managing Director Christian Chandra, 4B Indonesia will ensure that customers benefit from direct access to 4B's engineering expertise, innovative solutions, and superior product range, which includes elevator buckets, bolts, belting, forged chains, level controls, and hazard monitoring systems designed to enhance safety and operational efficiency.

Christian Chandra commented on the significance of this expansion: "By opening 4B Indonesia, we are bringing our expertise closer to customers and ensuring they receive faster, better service. Indonesia is a dynamic and growing market, and we are committed to serving our customers with best-in-class solutions and technical support that meets their needs."

Paul Dennis, President Director 4B Australia & Indonesia, added: "Indonesia is a strategically important region, and the launch of 4B Indonesia is an exciting step forward. Our goal is to not only offer world-class products but also to provide engineering solutions that enhance safety, efficiency, and productivity in bulk material handling systems. We look forward to building close partnerships with current and new customers in Indonesia."

With a reputation for innovation, reliability, and technical excellence, 4B Group is continuing to grow its global presence, ensuring its customers receive industry-leading products and support wherever they operate.
