

Hazardmon

HAZARDMON

APPLICATION

HazardMon.com® is a secure cloud-based hazard monitoring solution providing status notifications and data logging for bucket elevators and conveyors. Live system status, graphs and historical data can be viewed on any web-enabled device (smartphone, tablet PC, desktop or laptop computer). Emails can be sent to notify users whenever a change in the system's health is detected. An automated maintenance feature allows site operators to verify that all sensors on the system are operational and working correctly.

Hazardmon.com works in conjunction with 4B's Watchdog Super Elite™, T500 Elite Hotbus™ & IE-Node control systems for bucket elevators and conveyors. Both multi-function systems are specially designed to monitor equipment for belt misalignment, belt speed, continuous bearing temperature, pulley alignment, level and plug conditions.

FEATURES

- ▶ Secure Cloud-Based Monitoring
- ▶ Works with Watchdog Super Elite, IE NODE or T500.
- ▶ Real time system status & Alert email notifications.
- ▶ Data logged automatically
- ▶ Automated Maintenance
- ▶ Password protected network
- ▶ View on any web-enabled device (Smartphone, Tablet, Desktop or Laptop Computer).
